

RDO-E gas pressure regulator (axial with elastic gate)

Вход газа	Gas input
Задатчик	Setting device
Исполнительное устройство	Actuating device

Технические характеристики

Maximum input pressure, PN, MPa	10
Port area diameter, DN, mm	100
Working medium	natural gas at the temperature of -30...+40°C
Regulation limits, MPa	0.1...1.2 (or 1.2...4.0 depending on the setting device)
Type of connection to the pipeline	special flanged type. The flanges are included in the regulator composition.
Mounting position at the pipeline	any
Permissible output pressure fluctuations	±2,5% of the nominal value at input pressure fluctuations of ± 25%; ±1,5% in the gas flow rate range of 10% to 100%
